U.S.A / McFarland & Company, Jefferson, North Carolina, U.S.A., 2001. Soft cover. Condition: New. No Jacket. This gives a look at the end of the Cold War & the Russians submarines which were no longer needed to deter or fight Western navies and were very expensive to operate and maintain. Older submarines were taken out of service in large numbers, but without firm plans and infrastructure in place to remove and adequately care for their nuclear components, problems soon developed over the disposition of spent fuel assemblies. Problems arose also of course between Russia and the international community as to the best way to respond to the challenge. This book looks at those problems, first discussing Russias economy, its environment, and the Russian Navy, and then covering in detail the spent fuel of Russian submarines and related nuclear problems. With 8 illustrations & a 'Foreword' by William J. Perry. This is a 1st edition paperback, in new condition. (260 pages & 9 pages of introduction).
