

## Cyclopaedia of obstetrics and gynecology Volume 3

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 100 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1887 Excerpt: . . . peritonitis develops in consequence of the friction of the cyst against the abdominal walls, the intestines, and uterus, as well as to the changes and inflammations that may take place within the cyst. He has even reported rupture of the cyst and escape of the contents into the abdominal cavity, and some rare cases in which, in consequence of inflammation, cysts have discharged spontaneously, either externally, or into one of the pelvic viscera. Simple cysts are most frequent, and dermoid the next: the latter are most influenced by pregnancy, since, on account of their relatively smaller size, they occupy the true pelvis. The Influence of Cysts on Pregnancy. --The size of the cyst does not usually have any considerable influence on pregnancy, as long as it is nonadherent, and has a pedicle sufficiently long to allow of its floating freely in the abdomen. If the tumor...
