VISITOR CHARACTERISTICS, ATTITUDES, AND USE PATTERNS IN THE BOB MARSHALL WILDERNESS COMPLEX, 1970-82 (CLASSIC REPRINT) (PAPERBACK)**DOWNLOAD**

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Visitor Characteristics, Attitudes, and Use Patterns in the Bob Marshall Wilderness Complex, 1970-82 Trends in the characteristics of wilderness use and users are harder to measure, requiring a visitor survey for most characteristics. Perhaps because of this difficulty, these trends have been little studied. Only four related studies were found. One was based on repeat surveys of visitors to the Allagash River in Maine (Cieslinski Three surveys were conducted, but the first, in 1966, is not comparable with those in 1973 and 1975. Data for only eight variables were reported, and only use by large parties changed substantially, declining over the 2 years. Data from mandatory permits showed use more than doubling from 1966 to 1979, while parties became smaller and stays shorter. The second was a study of recreational use of the Rattlesnake area north of Missoula, MT, a National Forest area which was designated partly as a National Recreation Area and partly as wilderness in 1980 (Corti and others Use measurements were made in 1977 and 1981. Total use declined but use of the wilderness grew moderately and groups became smaller. Questionnaire surveys were also conducted in 1978 and 1981. There were no changes in the distribution of male and female visitors, occupations, or education, and only a slight tendency for 1981 visitors to have less previous experience in the area than 1978 visitors. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
