

## Intellectual Property Rights and Competition in Standard Setting: Objectives and tensions (Hardback)

By Valerio Torti

Taylor Francis Ltd, United Kingdom, 2015. Hardback. Condition: New. Language: English . Brand New Book. Competition and intellectual property rights (IPRs) are both necessary for a market to work efficiently and to promote consumer welfare. Properly applied, intellectual property rules define a legal framework which allows undertakings to profit from their inventions. This in turn encourages competition among firms and enhances dynamic efficiency, to the benefit of consumer welfare. Standard setting represents one of the fields where the interaction between competition law and IPRs clearly comes to light. The collaborative goal of standard setting organizations (SSOs) is to adopt and promote standards that either do not conflict with anyone's right or, if they do, are developed under condition that patents are licensed under defined terms. This book examines the tension between IPRs and competition in the standard setting field which can arise when innovators over-exploit the rights they have been granted and hold up an entire industry. The book compares EU and U.S. jurisdictions with a particular focus on the IT and telecommunication sectors. It scrutinizes those practices which could harm standard setting and its goals, looking at misleading conducts by SSOs members which may lead to breach the...
