

Attosecond and XUV Physics

Filesize: 5.52 MB

Reviews

Thorough guide! Its this sort of very good study. Yes, it really is play, nonetheless an interesting and amazing literature. You may like the way the blogger create this ebook.

(Dameon Hettinger)

ATTOSECOND AND XUV PHYSICS

Condition: New. Publisher/Verlag: Wiley-VCH | Ultrafast Dynamics and Spectroscopy | Written in an easy accessible style, this book supports the scientific training of young researchers in this emerging field. It provides fundamental knowledge in attosecond science and free electron lasers, such that both disciplines benefit from mutual exposure and interaction. | This book provides fundamental knowledge in the fields of attosecond science and free electron lasers, based on the insight that the further development of both disciplines can greatly benefit from mutual exposure and interaction between the two communities. With respect to the interaction of high intensity lasers with matter, it covers ultrafast lasers, high-harmonic generation, attosecond pulse generation and characterization. Other chapters review strong-field physics, free electron lasers and experimental instrumentation. Written in an easy accessible style, the book is aimed at graduate and postgraduate students so as to support the scientific training of early stage researchers in this emerging field. Special emphasis is placed on the practical approach of building experiments, allowing young researchers to develop a wide range of scientific skills in order to accelerate the development of spectroscopic techniques and their implementation in scientific experiments. The editors are managers of a research network devoted to the education of young scientists, and this book idea is based on a summer school organized by the ATTOFEL network. | Part I Laser Techniques Ultrafast laser oscillators and amplifiers Ultrashort- pulse characterization Carrier- envelope phase stabilization Towards tabletop x-ray lasers Part II Theoretical methods Ionization in strong low- frequency fields Multielectron high harmonic generation: simple man on a complex plane Time- dependent Schrödinger equation Angular distribution in molecular photoionization Part III High harmonic generation and attosecond pulses High- order harmonic generation and attosecond light pulses Strong- field interactions at long wavelengths Attosecond dynamics in atoms Attosecond processes in molecules Attosecond electron dynamics in nanosystems Part IV XUV and x-ray free electron laser experiments Strong- field interactions at EUV and X-ray...
