Mesure de Distances Simultanees Par Interferometrie Laser (Paperback)

By Perret-L

Univ Europeenne, United States, 2013. Paperback. Condition: New. Language: French . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Les limitations sur la resolution d un telemetre a balayage de longueur d onde sont principalement les turbulences et vibrations sur la difference de marche (ddm) cible, le traitement des franges, et la stabilite thermique et la dispersion dans l interferometre de reference. Celui-ci est un Mach- Zehnder athermal avec deux fibres optiques dont les revetements ont un comportement thermique different. Il presente une variation relative de quelques $1e-7/ C$ sur une plage de 30C. L analyse du laser a cavite externe a montre la presence de non-linearites que nous avons simulees par une somme de sinusoides, etudiant ainsi plusieurs parametres pour un traitement par Transformee de Fourier (TTF), comme le filtrage frequentiel, l amplitude et la frequence des non-linearites. Nous avons mesure des Incertitudes Relatives a 1 de $1e-6$ pour des distances de 1 a 20m, pour une ou deux cibles simultanees. Mais les non-linearites limitent la separabilite de deux cibles. Un echantillonnage non- uniforme permet de decorreler les spectres de cibles separees de 1mm...
