

## The Messenger of Mathematics Volume 25-26

Filesize: 8.37 MB

### **Reviews**

*It is easy in study better to understand. Of course, it is actually play, nonetheless an amazing and interesting literature. I am quickly could possibly get a satisfaction of reading through a published ebook.*

To get **The Messenger of Mathematics Volume 25-26** PDF, make sure you access the web link listed below and download the ebook or have accessibility to additional information which are highly relevant to THE MESSENGER OF MATHEMATICS VOLUME 25-26 book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1896 Excerpt: .each operation  $A^{r(n-1)}$  can be expressed in terms of the above  $n$  operations of order 2. Those of the operations  $T, M, d, A, i, u$  therefore, which are distinct form an Abelian group of order 2, where  $n$  may be equal to, but cannot exceed  $n$ . This group is transformed into itself by the operation  $S$ , and therefore by an elementary theorem in group-theory, the order of the group generated by  $S$  and  $A$  is either  $2n$  or  $2n - 1$ . (Suppose now that  $A$  and  $S$  are any two operations of order 2 and  $2 - 1$  respectively of a doubly-transitive group of degree 2 and order  $2(2 - 1)$ . Then all the operations of the group of order 2 are included in the form  $SAS^r$ , and they are all permutable with each other. Hence,  $A$  and  $S$  must satisfy a relation of the form  $A.S^{-1} = S^{-1}.AS$  Now by the above theorem,  $A$  and  $S$ , when connected by this relation, generate a group of order  $2(2 - 1)$ , where  $-$  does not exceed  $n$ . If  $r$  is greater than  $-$ , the group would contain more than  $2m - 1$  operations of order 2, which is impossible, since all the operations of order 2 are permutable among themselves. On the other hand  $r$  cannot be less than  $m$ , since the relation in question is a necessary one in order that  $A$  and  $S$  should generate the doubly-transitive group. Hence  $r$  must be equal to  $m$ , and the group is completely defined by the...
